Aloha Saint Louis School Parents and Guardians,

Providing an integral, quality education is one that involves a balance of educational approaches both traditional in nature and innovative. Blended learning at Saint Louis School is a balance of both approaches. On one side, students learn as traditionally done in groups through educational structures/methodologies like cooperative learning, project-based learning, direct instruction, seminars, and more. On the other hand, a personalized approach to educating students is also beneficial when used in conjunction with traditional methods. Personalized learning is an innovative approach where students are given the opportunity to work in their respective Zones of Proximal Development where great growth can be made. This is done by working with students individually as with the student-led conferences pictured below.

Empirical findings in research show that students retain approximately 90 percent of the information they teach. Student-led conferences provide our young men the opportunity to reflect upon what they've learned and allow them to express it individually, making it more likely that the information being communicated to their parents is logged into their long-term memory. Personalized learning can also be achieved with the use of computer assisted instruction (CAI). CAI is not considered online learning because CAI involves a professional educator who is tracking the progress of each student individually to help them relearn concepts and skills they were not able to master during group instruction or preview and learn new concepts/skills they have not covered during group learning.

As part of our four-year mission integration team plan, we will eventually extend student-led conferences to middle and high school students at Saint Louis School.

Enjoy the images below and stay Crusader Strong!

Memor et Fidelis,

Glenn Medeiros, Ed.D.
Saint Louis School
Head of School
Elementary students in the 5th grade utilized their computers to present in digital form what they've learned so far.

Kindergartners highlighted some of the things they learned using a kinesthetic approach with portfolios.

Here high school students present their findings to adults and students as part of a History Day project.

Middle School students take the time to visit our high school students and analyze their History Day projects.
Our soccer team soared to victory against Damien Memorial School on this beautiful afternoon.

Here a mother and her son spend time together in the main section of our elementary school where books and manipulatives can be found for students to use.

Students in this course were asked to dress accordingly with the theme of their presentations.
SLS students took part in an online game in McCabe Gym as one of several activities they enjoyed thoroughly.

Saint Louis School alumni were well represented at the funeral of Chief Keala, former police chief and graduate of Saint Louis School. As traditionally done, SLS alumni sang at the end of the service the alma mater we cherish so much.
